

# Weekly Coal Production

Production for Week Ended:  
March 13, 1993

## Summary

U.S. coal production in the week ended March 13, 1993, as estimated by the Energy Information Administration from railroad car loadings, totaled 19 million short tons. This was 5 percent higher than in the previous week, but slightly lower than in the comparable week in 1992.

Production east of the Mississippi River totaled 10 million short tons, and production west of the Mississippi River totaled 9 million short tons.
